These Wigs were invented by Richard Beck, of London, and made by one of the gentlemen in my establishment, who took the highest prominm for the best Wigs on exhibition at the industrial Exhibition, Loudon, in 1851. They are warraned notice brink; (those who have worn Wigs know that the greatest comfort in a Wig is in one that will no shrink at all.) besides, they are so close a resemblince to nature as to dely detection—and to enable gentlemen to see the effect, a large assortment is kept on hand for inspection, any of which, if approved of, saves the parchasor both time and trouble, as these slegant specimens of Wiss cannot be found elsawhern.
